PGA SL160

Higher insulated lift and slide door system

The lift-slide system is a modern option for glazing large openings. A sliding door frees up a large opening without taking up unnecessary space, unlike a swing door. Such a system allows you to get maximum light, visually expand the space, unite interior rooms between themselves or make a stylish exit to the terrace.

- ✓ High thermal insulation properties.
- ✓ Use of polyamide thermal breaks
Anti-bimetallic eliminates the possibility of jamming, opening corners, blowing and frost penetration.
- ✓ Full compatibility with PGA W62 and PGA W 72 window and door systems.

One-track systems

Two-track systems

Three-track systems
